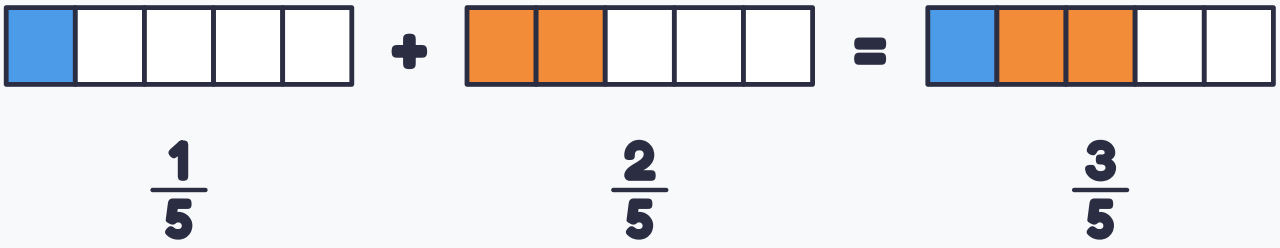
Sumas de fracciones

Con el mismo denominador, solo se suman los numeradores

Nombre: _____ Fecha: _____



$\frac{1}{5}$ $\frac{2}{5}$ $\frac{3}{5}$

$\frac{1}{4} + \frac{2}{4} = \frac{\square}{4}$

$\frac{2}{6} + \frac{3}{6} = \frac{\square}{6}$

$\frac{1}{3} + \frac{1}{3} = \frac{\square}{3}$

$\frac{3}{8} + \frac{4}{8} = \frac{\square}{8}$

$\frac{2}{5} + \frac{2}{5} = \frac{\square}{5}$

$\frac{1}{10} + \frac{6}{10} = \frac{\square}{10}$

$\frac{3}{7} + \frac{2}{7} = \frac{\square}{7}$

$\frac{4}{9} + \frac{3}{9} = \frac{\square}{9}$

$\frac{1}{6} + \frac{4}{6} = \frac{\square}{6}$

$\frac{5}{12} + \frac{6}{12} = \frac{\square}{12}$
